

EnCana Horne River Project

Four 60MM Btu PHM Heaters & One 25MM Btu UHM Heater

WELLONS CANADA PROJECT SCOPE:

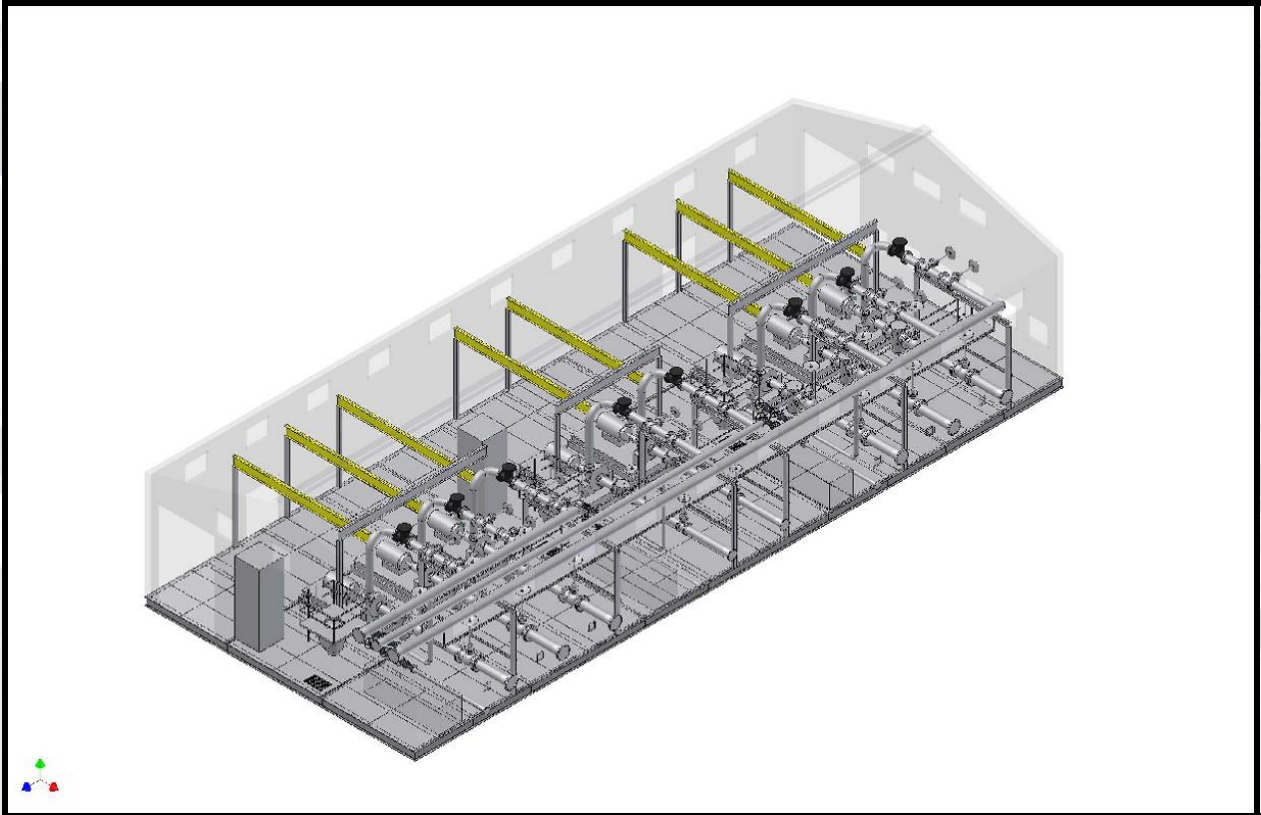

- **Four (4), 60MM BTU/hr Process Heat Medium (PHM) Wellons Canada shop assembled, skid mounted double helical coil gas fired glycol heaters**
- **Combustion air fans, gas burners and trains, for shop installation in prefabricated control rooms**
- **Two (2), shop assembled, prefabricated control room enclosures, two PHM heaters per enclosure. Shop electrical installation.**
- **Shop installation of glycol piping on the heater skids and in the control rooms; and shop fit pipe spools for field installation to interconnect the modules**

- **One (1) 25MM BTU/hr Utility Heat Medium (UHM) Wellons Canada shop assembled, double helical coil heater/control room skid**
- **Totally shop assembled heater skid including enclosure, combustion air fan, gas train, and glycol piping. Engineering services: foundation design, glycol**

Total Projects from Concept to Completion: The Wellons Service Edge

***EnCana Horne River Project
Nine Glycol Circulation System Pump Skids***

- **Nine (9), shop assembled glycol pumps skid modules, each skid up to 40' long and 16' wide, to fit together into a pump building facility on site**
- **Building (47' x 112' x 20' eave)**
- **Eight (8), 200 HP API 610 pumps; monorails for pump and motor maintenance**
- **Three solids filters**
- **Individual skid piping and valves shop installed; interconnecting skid pipe spools shop fit for field installation**
- **Shop electrical pre-wiring on skids**
- **Space heaters**
- **In floor drainage tanks**
- **Two emergency wash down stalls**
